INDEX.

	Page
Adopting a New Rail Rolling Process	44
Agricultural Tractors using Producer Gas	329
Air Conditioning and Dust Removing in Foundries	150
Anodic Coatings on Aluminium. Their Brittleness	307
Aspects of Industrial Lubrication	348
Automatically Reclosing Breaker for Co-ordinating Distribution Systems	180
Automatic Directional Control	117
Automatic Electrical Apparatus for Measuring the Moisture of Coal	392
Automatic Regulation of Earth Fault Extinguishing Coils	354
Auxiliary High Pressure or Independent Turbine	91
Bending Moment and Energy of Plastic Deformation	370
Blohm & Voss BV 141—The First Asymmetrical Aeroplane	265
Bolted Joints. Present Position of Technique	231
Bronze Welding in Repair	22
Carbonisation Properties of Diesel Fuels	313
Carbon Offers Solution to Materials Problems	238
Carbon Steels and Defence Conditions	17
Characteristics of Low Voltage Fluorescent Lamps at High Frequencies	58
Cold Drawn Steels	21
Combi-Motor of the Maschinenfabrik Örlikon	388
Composition as a Measure of the Tensile Strength of Cast Iron	343
Condition of Air Supply for Combustion in Furnaces	246
Control of Hydraulic Leakage	334
Corrosion Failures	255
D. C. Telemeter or D. C. Selsyn for Aircraft	315
Design of Heat Exchangers	130
Determination of the Variation of State in Turbo-Machinery by Means of the Increase in Entropy	176
Development of Cast Iron Alloys in Germany	12
Development of High Speed Coal Dust Engines in Japan	260
Developments in Plastics	226
Die Castings	23
Diesel Operation as Viewed from Various Aspects	93
Direct Indicating Electric Torsiograph	153
Directional Control-Automatic	117
Drag Problems in Present Day Aircraft Design	424
Drop and Upset Forgings	23
Economy of Coal Dust Engines	267
Economic Life of Incandescent Lamps	277
Effect of Arrests of Stressing upon the Endurance Strength of Ferritic Steels	60
Electro Acoustic Detonation Measurement	258
Electrical Drives for Wide Speed Ranges	218
Electric Drying of Grass	379
Electric Dynamometers for Engine Testing	248
Electric Elevators in Industrial Premises with Explosive Atmospheres	191
Electric Measurement of Humidity in Spinning Material	325
Explosive Rivets for Metal Clad Control Surfaces	355
Electric Supply for Future German Residence Buildings	55
Electric Traction Vehicles	186
Electrical Water Turbine Speed Regulator	274
Erratic Engine Performance through Fuel Vaporization	143
Experiments on Self Locking Differential Gears for Vehicles	48
Fatigue Strength of Chromium Plated Duralumin	252
Fatigue Tests by Means of Vibrators	275
Felts Meet Wartime Demands	390
Finishes for Metal Products	18
Fire Extinguishers in High Tension Plants	284
Forgeability of Metals	6
Frictional Properties of Rubber	226
Fuel Sensitivity of I.C. Engines	43
Gas Filled Cables	112
Gas Filled Cables aid System Supervision	114
Gas Fuel for Foundries	72
Gas-Turbine Locomotive	139
Gray Iron in Product Design	19
High Speed Photographic Illumination	115
Hipersil, an Improved Magnetic Steel	261
Hirth Coupling, an Improved Machine Element	64
How to Avoid Overstress in Machine Parts	126
How to Combine Copper Brazing and Copper Treating into a Continuous Process	87
How to Improve Tool Performance	84
How to Maintain Constant Linear Speed and Tension in Material being Unwound from One Reel to Another	128
How to Obtain Safer Operation of Large Motors in Hazardous Atmospheres	86
How to Provide a Drive having a Rapid Acceleration, Retardation and Quick Return Motion	124
How to Provide for Wide-Range D.C. Voltage Adjustment in Large Mercury Arc Rectifiers	122
How to Produce Surface Hardened Steel Parts Quickly and Economically	121
How to Obtain an Exceptionally Compact and Powerful Adjustable-Speed Drive	83
How to Pump Power from a Varying-Speed Source into a Constancy-Frequency System	81
How to Select, Instal and Maintain Arc-Welding Sets	418
How Synthetic Rubbers meet Current Demand	301
Ignitron Rectifiers in Industry	414
Improved Bussing N.A.G. Piston Head for Ante-Chamber Diesel Engines	66

	Page
Improvements in Lightning Arresters	220
Increase in Output by Automatic Operation of Machine Tools	401
Increasing Welding Efficiency	310
Influence of Compressibility of the Fluid on the Properties of a Centrifugal Boiler	170
Influence of Dimensions and Temperatures on Impact Test Figures	28
Instrumentation	27
Larger Arc-Welding Electrodes Speed-up Production	227
Large Electrolytic Equipments	147
Light Metals and Steel	89
Low-Tin Solders	164
Machinability of Cast Iron	20
Machines, Apparatus and Tools at the Swiss Industries Fair	210
Magnetic Powder Testing	25
Mass Radiographic Inspection	27
Measurement of Dust in Flue Gas	285
Mechanical Optical Extensometer	111
Metallographic Inspection	26
Metallurgy of Manganese	69
Million-Volt Industrial X-Ray Unit	32
Modern Automatic Sawing Machine with Hydraulic Gear	406
Most Efficient Layout of Electric Arc Furnace Steelworks	429
National Defence Materials	24
New Three-Voltage Distribution System	291
New Type Single Jet Carburettor	312
New 2,000 B.H.P. Diesel Electric Road Locomotives	367
Octane Number and Multi-Cylinder Engines	216
Oil Separators for Steam Engines	52
Photo-Electric Safety Coupling	260
Piston Design for Longer Endurance	279
Piston Ring Pressure Distribution	381
Powder Metallurgy	19
Powder Metallurgy of Tin	271
Power for Man-made Hurricanes	167
Power Plant Problems	399
Problems of Naval Aircraft	356 & 374
Problems related to Two-stroke Engines	297
Progress in Structural Design through Strain-guage Technique	317
"Purging" Controlled Atmosphere Furnaces	340
Radiographic Inspection	27
Radiography at High Speed	183
Rapid Analysis of Iron Ore	213
Rectangular Plates under Uniformly Distributed Fluid Pressure	376
Role of Plastics	17
Rotating Induction Furnace	205
Rubber in Machine Construction	99
Safe Speeds for Flywheels	100
Saving Fuel in Gas-heated Furnace Plants	195 & 208
Saving Material and Time in Aircraft Construction	261
Scarfing High Carbon and Alloy Steels	282
Screw Machine Products	22
Separation of Impeller and Diffusor Losses in Radial Blowers	172
Silver Brazing Alloys	21
Similarity Considerations relating to Turbines and Compressors	201
Single-pole Fault Clearing for Greater Stability	223
Sinking Head Metal	62
Smaller Transformers by Forced Cooling	386
Specifications and Standardisation	24
Spectrographic Analysis	28
Stabilisation of Flow in Hydraulic Machines	2
Steel Castings	20
Steel-clad Mercury Rectifiers with Rare Gas Filling	305
Steel Production in Graphite-bar Heated Furnaces	242
Stereoautograph A6 of the Wild Company	108
Storage of Summer Surplus Energy for Central Heating in Wintertime	54
Strength of Blast Furnace Coke	66
Stresses and Deformation under Torsion of Thin-walled Cylinders with Circular Cut-outs	372
Stressed Skin Structures in Plywood	187
Supercharging of Internal Combustion Engine Plants Driven by Producer Wood Gas, with Special Reference to Motor Vehicles	137
Supercharging of Two-stroke Diesel Engines	393
Survey of the Present-day Importance of Extinguishing Coils as a Protection against Earth Faults	352
Synthetic Foils save Metal	73
Synthetic Materials and Climate	31
Telephone Cable with Synthetic Material Sheathing	152
Testing of Aluminium Castings	365
Thermal Expansion of Synthetics	336
Thermostating for Comfort	346
Theoretical Considerations on Altitude Supercharging of Aeroplane Engines by means of Charging Blowers driven by Exhaust Gas Turbines	134
Torsional Fatigue Strength of High Tension Steel	427
Trapping Dust Electrically	250
Up-to-date Summary of Question of Detonation	407
Use of Pressed Metal Powders	194
Utilization of Heat in Industrial Furnace Plants	162
Utilization of Steam Passenger Locomotives	75 & 107
Vaporisation by Heavy Current Arcs	254
220,000 Volt System of the Hydro-electric Power Commission of Canada	35
Wartime Heavy Vehicle Design in Germany	104
Welding Quality Steel	26
Welding Transformers and their Control Equipment for Unionmelt Welding	420
Wind Tunnels—Birthplace of Streamlining	165
